Walleye Culture Manual
Walleye Culture Manual

Robert C. Summerfelt, Managing Editor

A publication of the North Central Regional Aquaculture Center (NCRAC)
in cooperation with

United States Department of Agriculture
(Grant 91-38500-5900)
This book is available as a perfect bound version (EDC-79A) or as a 3-hole punch notebook insert (EDC-79).

Either version may be obtained for $24.95 ($19 plus $5.95 shipping and handling) from ISU Extension Distribution. International — either version for $34 ($19 plus $15 shipping and handling).

Chapter or Case Study
North Central Regional Aquaculture Center

The North Central Regional Aquaculture Center (NCRAC) was formed in February 1988. It is one of five regional aquaculture centers administered by the U.S. Department of Agriculture (USDA). The mission of these centers is to support aquaculture research, development, demonstration, and extension education to enhance viable and profitable U.S. aquaculture production which will benefit consumers, producers, service industries, and the American economy. They work together within the broader, integrated aquaculture program of the USDA to promote a well-developed and sustainable aquaculture industry in this country.

NCRAC programs are jointly administered by Michigan State University (MSU) and Iowa State University (ISU). The Office of the Director is located at MSU while the Associate Director’s Office is at ISU.

As an administrative unit, NCRAC serves 12 states in the Midwest: Illinois, Indiana, Iowa, Kansas, Michigan, Missouri, Minnesota, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. It relies on leaders in the aquaculture industry for direction in its programs. The Industry Advisory Council (IAC) sets priorities. A Technical Committee, researchers and extension specialists, works with the IAC to formulate program priorities. Regional programs are meshed with those of the other Centers to avoid duplication. Teams of research and extension aquaculture specialists from regional universities and public agencies develop and execute work plans to investigate priority problems identified by the IAC. A Board of Directors oversees the administration and management of NCRAC’s programs.

Questions about the programs of NCRAC may be directed to:

Dr. Ted R. Batterson, Director
North Central Regional Aquaculture Center
Department of Fisheries and Wildlife
Michigan State University
East Lansing, MI 48824
Telephone: 517-353-1962
FAX: 517-353-7181
E-mail: batters2@pilot.msu.edu

The NCRAC Publications Office at ISU serves as the outlet for regional aquaculture communications. The Associate Director of NCRAC is in charge of this office.

Preface .......................................................................................................................................... xiii

1 Introduction ................................................................................................................................. 1
Robert C. Summerfelt, *Department of Animal Ecology, Iowa State University, Ames, Iowa 50011-3221*

2 Reproductive Biology and Spawning .......................................................................................... 11
Jeffrey A. Malison and James A. Held, *University of Wisconsin-Madison Aquaculture Program, Department of Food Science, 123 Babcock Hall, Madison, Wisconsin 53706*

• Case studies

Walleye Spawning Operations at Bonny Reservoir, Colorado .......................................................... 19
Charles D. Bennett and James L. Melby, *Colorado Division of Wildlife, 2126 Colorado Springs, Colorado 80907*

Walleye Spawning in Michigan ........................................................................................................ 21
James A. Copeland and Martha M. Wolgamood, *Michigan Department of Natural Resources, Fish Health Laboratory, 34270 CR 652, Mattawan, Minnesota 49071*

Collection and Spawning of Walleye Broodfish and Incubation of Fertilized Eggs ....................... 25
James E. Harvey and Shyril E. Hood, *Pennsylvania Fish and Boat Commission, Linesville Fish Culture Station, P.O. Box 127, Linesville, Pennsylvania 16424-0127*

Incubation of Walleye Eggs at Garrison Dam National Fish Hatchery ....................................... 29
David Paddock, *U.S. Fish and Wildlife Service, Garrison Dam Fish Hatchery, P.O. Box 530, Riverdale, North Dakota 58565*

Stripping, Fertilizing, and Incubating Walleye Eggs with Big Redd Incubators ............................... 31
Elizabeth Greiff, *St. Croix Tribal Natural Resources Department, P.O. Box 287, Hertel, Wisconsin 54845*

Stripping Walleye Eggs Collected from Speared Fish and Incubation of Eggs using Big Redd Incubators .................................................................................................................. 37
Michael P. Gallinat, *Tribal Fisheries Biologist, Red Cliff Fisheries Department, P.O. Box 529, Bayfield, Wisconsin 54814*

Stripping, Fertilizing, and Incubating Walleye Eggs at a Minnesota Hatchery ............................... 41
Doug Thompson, *Minnesota Department of Natural Resources, 1429 Grant McMahon Blvd, Ely, Minnesota 55731*

Comparative Storage Methods and Fertility Studies of Walleye Semen ........................................ 45
George G. Brown, *Department of Zoology and Genetics, Iowa State University, Ames, Iowa 50011,* and Alan A. Moore, *Rathbun State Fish Hatchery, Iowa Department of Natural Resources, RR 2, Moravia, Iowa 52571*

Use of Semen Extenders for Walleye ............................................................................................. 51
Alan Moore, *Rathbun Hatchery, Iowa Department of Natural Resources, RR 2, Moravia, Iowa 52571*

Field Utilization of Extended Semen .............................................................................................. 55
Keith D. Koupal, *Colorado Division of Wildlife, 6060 Broadway, Denver, Colorado 80216*
3 Collection and Care of Broodfish ......................................................... 63
James R. Satterfield, Jr., Colorado Division of Wildlife, 6060 Broadway, Denver, Colorado 80216
and Stephen A. Flickinger, Department of Fishery and Wildlife Biology, Colorado State University Fort Collins, Colorado 80523

- Case studies
Collection of Walleye Broodstock, Egg Take, Incubation, and Fry Production at the Oneida Fish Cultural Station .......................................................................................................................... 71
Richard T. Colesante, New York State Department of Environmental Conservation, Oneida Fish Cultural Station, Constantia, New York 13044

Development of a Domestic Walleye Broodstock ............................................................................................................................. 75
Tim Nagel, London Fish Hatchery, Ohio Department of Natural Resources, Division of Wildlife, London, Ohio 43140

Wild Broodstock Collection in Iowa ................................................................................................................................. 77
Wallace D. Jorgensen, Spirit Lake Hatchery, 611 252nd Avenue, Spirit Lake, Iowa 51360

4 Transportation and Handling of Walleye Eggs, Fry, Fingerlings and Broodstock .............................................................................................................. 79
Richard T. Colesante, New York State Department of Environmental Conservation, Oneida Fish Cultural Station, Constantia, New York 13044

- Case study
Distribution of Walleye Fry and Fingerlings .............................................................................................................................. 85
James D. Lilienthal, Minnesota Department of Natural Resources-Fisheries Section, Route 4, Box 19A, Little Falls, Minnesota 56345

5 Walleye Fingerling Culture in Drainable Ponds .................................................. 89
Robert C. Summerfelt, Christopher P. Clouse, Lloyd M. Harding, and James M. Luzier,
Department of Animal Ecology, Iowa State University, Ames, Iowa 50011-3221

- Case studies
Pond Production of Fingerling Walleye at Garrison Dam National Fish Hatchery .................................................................................................................. 109
John E. Call, U.S. Fish & Wildlife Service, P.O. Box 530, Riverdale, North Dakota 58565

Walleye Fingerling Production Techniques in Drainable Ponds on the Lac Du Flambeau Indian Reservation .......................................................................................................................... 111
Larry J. Wawronowicz and Willis G. Allen, Lac du Flambeau Tribal Natural Resource Department, P.O. Box 67, Lac du Flambeau, Wisconsin 54538

Fertilization Procedures for Pond Culture of Walleye and Saugeye ............................................................................................................................ 115
David A. Culver, Department of Zoology, The Ohio State University, 1735 Neil Avenue, Columbus, Ohio 43210-1293

Fingerling Production in Drainable Ponds at White Lake Fish Culture Station .................................................................................................................. 123
David D. Flowers, Ontario Ministry Of Natural Resources, White Lake Fish Culture Station, RR2 Sharbot Lake, Ontario, CANADA, K0H 2P0
Walleye Culture in a 100-acre Drainable Pond in Northern Michigan ................................. 129
